A Java Developer Enthusiast with Strong skills in developing logic and developing pgm. Proficient in Core Java, JDBC, SQL, MySQL, self-motivated individual with excellent analytical and problem-solving skills. Excited to work in an organization where I can gain knowledge as well as use my skills to help in the growth of the organization.

HIGHLIGHTS OF EXPERTISE

- Comprehensive knowledge of object-oriented programming concepts and principles
- Proficient in creating and implementing multithreaded applications.
- Strong understanding of the principles of software development life cycle.
- Excellent debugging and troubleshooting skills.
- Ability to debug and optimize code for better performance.
- Proficient in developing and implementing databases using Oracle, MySQL, and SQL Server.
- Proficient in using Eclipse, IntelliJ for Java development.

PROFESSIONAL SKILLS

1. Hands on Knowledge of Java
2. Understanding of Object-Oriented Programming Concepts
3. Ability to develop, debug and maintain Java applications
4. Familiarity with common Java frameworks and libraries
5. Understanding of basic data structures and algorithms
6. Understanding of software design principles
7. Good problem-solving skills
8. Ability to work independently and as part of a team
9. Good written and verbal communication skills
10. Ability to learn quickly and adapt to changing requirements

TECHNICAL SKILL

-
1. Language Fundamentals Core Java a.Class b.object c.Abstraction d.Encapsulation e.Inheritance f.Polymorphism g.Constructor
 2. Mysql
 3. Excel
 4. C programming language
 5. HTML
-

PROJECTS/TASKS

1. Employee Email Management System(Core Java):

Project : Employee Email Management System.

Role : Member

Environment : java

Team Size : Group

Description:

The Most Searching Program is of Employee details. An employee is an entity that can have Several attributes like id,name,and department etc .In order to create a java Employee details pgm,we need to create a class for employee entity and create properties of the employees.

We will create the getter and setter for getting and setting the values of the properties.In the main class,we will create The object of the employee class,and by using its object, we will access the properties of the Employee class.

2. Bank Management Software using core :

Project : Bank Management Software.

Role : Member

Environment : java

Team Size : Group

Description:

One should be able to deposit money and withdraw money from a particular account as the desires. There should be a Validation to allow only a particular amount of cash inflows at any time, as well as to allow withdraws if the balance is Sufficient. There should also be the calculation of Interest and its addition to the Balance every month.

EDUCATION

Dr.J.J.Magdum College of Engineering, Jaysingpur, Shivaji University. 2016– 2019 Percentage (64.44).

Bachelor of Engineering (BE)in Electronics and Telecommunication (E&TC).

Diploma (2016) with 69.40%, **SSC** (2013) with 73.40% Maharashtra State Board

CERTIFICATIONS

1}Embedded System in Bicard institute,pune(Experience of 6 Month)019-2020

2} Core Java Course Certificate in PRsoftware,Hydrabad (Experience of 2 Months)022-2022.

3} Java Course Certificate in Isoft Training,Chennai (Experience of 5 months)022-2023.
