Projects

1. Sentiment Analysis from Text Feedback

2021 – 2022

- Sentiment analysis is part of the Natural Language Processing (NLP) techniques that consists in extracting emotions related to some raw texts. This is usually used on social media posts and customer reviews in order to automatically understand if some users are positive or negative and why.
- Technology used : Python , NLP algorithm , Twitter API

2. Hospital Management System

2020 – 2020

- The project Hospital Management system includes registration of patients, storing their details into the system, and also computerized billing in the pharmacy, and labs. The software has the facility to give a unique id for every patient and stores the details of every patient and the staff automatically.
- Technology used : Mysql , Java , HTML , CSS
