Project:

Title : **PayUMoney**

Client : PayU Payments Private Ltd.

Environment : Java, WebDriver, Maven, TestNG, POI.

Project Description:

PayU India launched **PayUMoney**, a web-based product that enables small and medium sellers to put their stores online in minutes and transact through the PayU gateway in April last year. It offers a gamut of free tools like a payment gateway, web store, email invoicing and an event-ticketing platform, etc. to collect payments online. PayUMoney has been integrated with more than 8,500 merchants, which makes it the most widely available wallet service in the e-commerce category. Moreover, It comes with features like stored card, which enables users to do a speedy checkout. The intent is to allow users to pay through usual payment options like credit cards, debit cards or net banking and reward them with instant cashback. **BookMyShow, Goibibo, Jabong** etc. are the websites which are using the payumoney.

For Buyers: PayUMoney should be the preferred means of payment for a buyer to avails various discounts.

For Merchants: PayUMoney is payment solution that helps merchants to be able to seamlessly collect payments.

Key Responsibilities:

- ◆ Involved in Selenium Automation Framework development with Eclipse, TestNG and Maven.
- ◆ Responsible for creating and customize test scripts in Java in TestNg format.
- ◆ Interacting with Developers for assisting them in the Identification and tracking of Problem events.

- ◆ Used Eclipse and MAVEN for creating and running scripts.
- ◆ Developing and modifying the scripts whenever changes were happened in Application.
- ◆ Prepare the review reports (code reviews, execution reviews) for the automation scripts.
- ◆ Documented and Communicated test results using Jenkins.
