## PROJECT

### Labour Hiring Portal

Platform-J2EE, React, MySQL

Labour Hiring is an application which connects Job Providers and labours. It provides the ability to Register this application for Both labours and Job Providers where Job Provider are the source of the Jobs and the labour can find and apply for their targeted job. Where Admin can Manage Both Job provider and Labour Admin can add and remove Both Job Providers and Labours.

### Finite Element Analysis of Bio-Brake Pad Material

Platform-Catia, Ansys

In the Modern Passenger Car Braking system, Disc brakes play a vital role in providing better performance and safety, in which brake pads are the most critical part to decide the overall brake performance. In such brake pads, there are some technical challenges such as wear rate, abnormal noise & environmental issues with existing asbestos material. Hence we made a research to furnish suitable eco-friendly & cost effective solutions.
