

Bishal Singh

ETL DEVELOPER

Ph.: +91-7909044354

Email: bishalsingh022@gmail.com

Location: Dumka (Jharkhand)

Professional Summary

- 3years of IT experience.
- Expert in Data Migration strategies and Business Intelligence techniques.
- Versed in ETL architecture and design.
- Worked on Logistics domains.

Technical Skills

- **Databases:** SQL Server
- **ETL Tools:** SSIS
- **Others:** Data warehouse , ADF

Professional Certification:

- AZ 900 (Microsoft certified)

Educational Qualification:

Bachelors of Technology in Electronics and Communication from West Bengal University of Technology (MAKAUT, YR-2018)

Project Summary & Role: Programmer Analyst, Cognizant

PROJECT NAME	JB HUNT
ROLE	Developer
DURATION	1.2 year (Dec 2019- Feb 2021)
PROJECT SPECIFIC SKILLS	SSIS, SQL Server, Azure blob ,Data factory

PROJECT DESCRIPTION

Data migration from On-Premise SQL server to SQL Database through SSIS based on CDC (Change Data Capture), SCD, Lookup and lifting and shifting ssis package to adf.

Key roles and responsibility:

1. Created Complex ETL package using ssis to extract data from on-premise to staging area through incremental load.
2. Lifting and Shifting to azure data factory
3. Created Packages for full load.
4. Created Sql join, Subquery for data extraction.
5. Performance Tuning
6. Data Transformation and Migration using SSIS ,Preparation of mapping document
 - Develop T-SQL Code for dimension and facts.
 - Develop SSIS package to meet the requirement.
 - QA/UAT/ Production Deployment and Support.
 - Code & Query Optimization using complex T-SQL coding.
 - SSIS package deployment

Project Summary & Role: Programmer Analyst, Cognizant

PROJECT NAME	METLIFE
ROLE	Developer
DURATION	10 months (Jan 2019-Oct2019)
PROJECT SPECIFIC SKILLS	SQL Server, SSIS

Project Description

The project is about getting Trading data from different upstream system , Transforming them as per the requirement and making it available to downstream system for consumption in correct format.

Key roles and responsibility:

- 1 Communicating design and other technical information both verbally and in written format
- 2 Create source to target mappings and ETL design for integration of new/modified data streams into the data warehouse/data marts
- 3 Proficient in leading and managing the development resources
- 4 Validate the ETL design and ensure that technical specifications are complete, consistent, concise, and achievable
