ACADEMIC PROJECTS

Car Parking Management System

This Project Car Parking Management system has been developed on Windows C# Programming Application. Now a days in many public places such as malls, multiplex systems, hospitals, offices, market areas there is a crucial problem of car parking. The car parking area has many slots for car parking So there is need to develop a car parking system.

The project entitled Car Parking Management System is to manage the car parking bay. This software helps the User to car in and car out details, apart from this it also helps in accounting. Using this software can track the total amount collected.

Hospital Management System(Mini Project):

Store and View Details of Patients and Doctors. This Project done in C language.

INTERSHIP

Front End : HTML, HTML-5, CSS, CSS3.0, JAVASCRIPT, BOOTSTRAP.

Programming : C++,Python

Back End : Database SQL-MySQL, ORACLE

Frasco Food Delivery Services

Traditionally, people had to make calls to place orders or drive to the restaurants for a take-out, then wait for the food to be prepared and delivered. Sometimes, placing an order on the phone means that there could be mistakes in order.

Clearly, these aren't really the best solutions to order food from restaurants especially for people with busy lifestyles. This system is developed to manage ordering activities.

TECHNICAL SKILLS

C++	Python	HTML
HTML-5	JavaScript	
Oracle	CSS	

TRAINING

Python Programming

Oct -2021 : Present

Anvistar IT-HR services, Pune.
