Organization: TCS
Role: Developer
Technology: Power BI, SQL Server, Cosmos
Team Size: 9

Projects: Purchase BI Reporting

Description:

Enable understanding the success of promotional efforts, the primary mechanism, enable category leads to measure the success of their category specific areas (Category pages, Sales pages) in regards to engagement and conversion on the online store field merchandisers have to increase online store revenue. Allows to fully track and measure the performance of the Surface Plus business. This is a new business model, which provides a financing solution to the end customer. There is quite a lot of interest in the market here and can optimize the business (based on reporting/insights).
Purchase BI builds and/or maintains a variety of legacy Power BI workbooks and views that the digital store team has used on an ad hoc basis and for ROB material. The Digital Store Field and Category teams heavily leverage these reports.

Responsibilities:

✓ Understanding the client requirements.
✓ Importing Source/Target tables using SQL Server and Cosmos.
✓ Designing and implementing the Database, Views, Stored Procedures, Joins.
✓ Experience in working with Power BI reporting calculated columns, cubes, dimensions, roles and deploying of analysis services project.
✓ Creating reports in Power BI Desktop with various charts and publishing them to Power BI service.
✓ Creating dashboards and apps to share.

Client: Microsoft Corporation   **Jan 2017 – Nov 2017**
Organization: TCS
Role: Developer
Technology: Power BI, SQL Server, SSIS, SSRS, SSAS- Tabular Model
Team Size: 7

Project: Digital Store Analytics

Description:

Digital Store Analytics is a business intelligence platform to deeply understand customer behavior, track sales performance and analyze optimization efforts. Project mainly focuses on sales generated by Microsoft by various stores through their various products in all around the world.

The target is to capture and analyze customer data, so that clients can figure out hidden patterns of consumer behavior and get immediate answers to important business questions.

Majorly working on identifying cross-functional work streams and players, track performance of Windows Apps and Games, Console Apps and Games (Xbox), EBooks, Office 365 Movies and TV. This demands to build reports for understanding and trending performance of the Microsoft Corporate products and promotions. The goal of these reports is to provide standard views for run-of-business reporting including campaign creative performance.

Responsibilities:

- ✓ Understanding the client requirements.
- ✓ Importing Source/Target tables from the respective databases using SSIS.
- ✓ Business Intelligence and Reporting
- ✓ Create a measure and dimension matrix of each report to show what is available
- ✓ Develop, enhance and maintain Power BI reports
- ✓ Provide weekly/monthly dashboard refresh insights on developed reports to stake holders and clients
- ✓ Financial performance and approval funnel reporting for the Microsoft Product, Promotions and consumer leasing programs.
