Professional Summary

Approx. 1 year of Software Development experience in designing, developing and implementing client/server web application, object-oriented programming in SDLC using .Net technologies

- Working Knowledge of Microsoft .Net framework 4.0, 4.5, Visual Studio 2010, C# and SQL.
- Experience in data access technology like ADO.Net and MySQL.
- Experience in different phases of SDLC
- Design and Development of Client-Server and web application using OOAD methodologies
- Knowledge of programming writing SQL statement, complex stored procedures, views and triggers.
- Database design and Development using MySQL.
- Knowledge of TDD (Test Driven Development), API, EF (entity framework), Agile environment and LINQ.
- Good analytical skills with interpersonal and communication skills.
- Goal oriented, Team player, self-starter, proactive and able to work independently too.

Work Experience

Full Stack Developer - Freelancer   September 2018 TO November 2018

• Designed library file project which notifies admin about memory consumed, traffic per page and error generated and involved in different phases of SDLC.
• Involved in detailed Report making with all OOAD diagrams and presentation with team leading skills.
• Designed web application using MVC architecture and did client side as well as server-side validation's using jQuery and Data Annotations.
• Used ADO.Net, LINQ to access and retrieve data from MS SQL server.
•Developed stored procedures, views, indexes in MS SQL server for CRUD operations and display on UI interface.
• Involved in fixing bugs using debugger
• Configured web configuration files to add themes to project and implemented master page technology for consistent look.

WEB DEVELOPER - PKC SOLUTION   May 2018 TO August 2018

• Collaborated with end users, plan system flow, manage design considerations, implementation while managing time flows
• Involved in different phases of SDLC
• Involved in Responsive design and development of UI screens using ASP.Net web server controls and user controls, HTML, CSS, Bootstrap, JavaScript and jQuery.
• Designed web application using MVC architecture and did client side as well as server-side validation's using jQuery and Data Annotations.
• Used EF to access and retrieve data from MS SQL server.
• Developed stored procedures, views, indexes in MS SQL server for CRUD operations and display on UI interface.
• Involved in fixing bugs using debugger and Jira Tool
Configured web configuration files to add themes to project and implemented master page technology for consistent look.
• Used .Net validator controls for validating information provided by users.

Skills

• Database Designing and Development (**MS SQL, T-SQL, UML Diagrams**)
• Web Page and Website Designing (**HTML, CSS, Bootstrap, JavaScript, jQuery, AJAX**)
• .Net (**C#.Net, ASP.Net, MVC, ADO.Net, LINQ, EF, Xamarin, API, SSIS**)
• Manual testing (**Debugging, JIRA**)
• Extra (**TFS, Agile Environment**)

Education

• Post Graduate Certificate in Computer Software and Database Development – **Lambton College**   August 2018
• Bachelor of Engineering in Computer Science and Engineering – **Parul Institute of Engineering and Technology**   June 2016
