- Experience in performing the Usability Testing, Functional Testing, Black box Testing, White box Testing, Regression Testing, GUI, Database Testing, Integration Testing, System Testing, Multi Browser Testing, Localization, Module Testing, Ad-hoc Testing, Security Testing and Exploratory Testing etc.
- Handling testing alone in the team.
- Experience in Resource Planning and Test Planning
- Involved in Functional and Non-Functional Requirement clarification with business analysts.
- Experience in Testing of Products, applications on Web Environment and Windows.
- Extensively involved in preparing/reviewing Test Scripts, Test Scenarios and Test Cases from Requirements. Also involved in preparing Test Plan.
- Worked closely with QA and Developer to Regress, Reproduce and Resolve Bugs.
- Knowledge on different Levels of Testing (Unit Testing, Integration Testing, System Testing and Acceptance Testing).
- Worked on Automation Testing - **Selenium in Python**
- Involved in the defect review meetings.
- Accurate, efficient and methodical in assigning tasks. Possess excellent numerical, problem-solving and analytical abilities.

## TECHNICAL SKILL

| Manual Testing | Writing and executing test cases, prepare test plan, Review test cases, Black Box testing, Regression testing, Integration testing, Functional and Non-Functional testing, Database testing and Creating checklists and bug reporting |
|---|---|
| Tools | Asure Devops, SPIRA, JIRA, Jenkins, Perforce, GIT, PyCharm |
| Operating System | Windows |
| Database | MySQL |

| Software Q/A | SDLC, STLC, Bug Life Cycle, Agile Methodologies |
|---|---|
| Testing Tool | Selenium (Python), Selenium (Core Java) |
| Domain Knowledge | Supply Chain Core Domain |
| Language | Python, Java |

## PROJECT

**Employer #1:** One Network Enterprises, Inc., Pune

**Project Title** – Jasper Reports
**Role/Designation –** QA Engineer I
**Description** – Worked here for Manual Testing as well as Automation Testing. We are performing testing with the help of Spira, JIRA. Majorly the work revolves around Manual Testing, but we do Automation Testing as well.
In parallel, also involved in our basic Product Functionality testing.
**Role/Responsibility**
- Reviewing the software requirement document and checking the functionality and its implementation in the application on the first level in order to ensure that release is ready for test.
- Writing the test cases according to the change request by the client in functionality.
- Validating the data in the database and checking the SQL queries provided by development team.
- Involved in the execution of Test cases as per the Module Assigned by lead
- Automating Low/Medium Test Cases in Selenium using Java whenever required

**Technology/Environment**
Language: Java
Database: Oracle 11g.
OS: Windows OS
**Team Size: 6**
**Location:** One Network Enterprises, Western Center III, Aundh (Pune)
