Chaitanya R Patil

Software Enthusiast

Skills

C, Core JAVA, Advanced JAVA

HTML, MySQL , Database Management

SpringBoot framework

REST APIs, API Management , Testing using Postman

Project Management using Maven, Git and Github

Projects

Library management system
MySQL

This system is handy for the people going to the library for their desired book and the librarian to guide them and take care of these things. It ensures that everything works in systematic order, given that each person taking or returning books needs to enter the record in the system.It also shows all the available books, their count , books taken by people, the date a particular book is borrowed, expected date of return, late due fees, membership details, and so on.

Customer Management Portal for Bank
HTML, CSS, MySQL , JAVA

This system is built to keep track of customer data including transactional data. It also enables the admin to access history and perform further functions as per requirement.

Employee Data Management
JAVA , MySQL

Simple system to store and retrieve employee details.
