Objective:

   To secure a challenging position in a reputable organization to expand my learnings, knowledge, and skills.
Secure a responsible career opportunity to fully utilize my training and skills, while making a significant contribution to the success of the company.

Software Projects:

Project 1: Hospital and Patient Application
Technology Used: Android, java, xml
Database: Firebase
Takeway: In Hospital and Patient Application Admin add and modify hospital details, modify the doctors and Patients details, view hospital and doctor details. Patients can choose the best preferred appointments from the options provided and can also change the appointment schedule or cancel it. Patients have access to only their records. Doctors can view the patient appointment list and provide the confirmation or make changes in the appointment list if required. Doctors have access to only records of those patients whom they are treating.

Project 2: Training And Placement Data Authentication
Technology Used: ASP.Net, HTML, CSS
Database: MS SQL
Takeway: This system can be used as an application for the placement coordinator of the college to manage students information with regards to placement. This software is supported to eliminate and in some cases reduce the hardships faced by this existing system. Developing web application to handle internal activities of college placement process. In this application mainly the roles are involve Admin, Placement co-ordinator, Guest and student. Activities of admin are Create new account for placement co-ordinator as per faculty like BCA or MCA, Filter students data as per criteria to verify, Download attached documents which was uploaded by respective student, Verify documents, Update status about verification has done etc, Generate report. Activities of guest are Create a new account as student with primary information, After registration system will trigger email with username and password to respective student. Activities of student Register student can update education details and upload required educational document to verify. Activities of placement co-ordinator are respective co-ordinator can able to download uploaded documents for verification, Verify documents, Update status about verification has done etc, Generate report.
