Project Name — *Total Reward System*

COMPANY: *Enosis Solutions Pvt. Ltd., Pune*

JOB PROFILE: *Software Test Engineer*

Description:

The Total Rewards Statement (TRS) product is currently being used for a client but is done manually. It gives the employer and employee an accurate and comprehensive view of the remuneration and reward benefits of the human capital. The manual system adapted to work this out per employee is cumbersome, time-consuming and with a volume of staff, the accuracy could be at risk of human error. Therefore there is justification and direction for this manual process to be automated.

Responsibilities:

→ Involved in the Requirements Review and participated in Requirement discussion with Business Analyst.
→ Executed Functional, System, Integration Test cases.
→ Converting Manual Test Cases in Automation Scripts.
→ Generating the Automation scripts
→ Identifying the defects and retesting the fixes.
→ Defect uploading, reporting using Quality Center.
→ Written Production Test cases and executed the same.
→ Executing the test scripts, analyzing the results, updating the status.
