ASPIRING JAVA DEVELOPER ~ SOFTWARE DEVELOPMENT PROFESSIONAL
2+ years' rich experience in delivering optimal results & business value in high-growth environments

PROFILE

Performance-driven professional with diversified experience in Software Development, Quality Assurance, Resource Optimization & providing technical consulting in diverse technology areas. A back-end developer having in-depth knowledge of designing,development & implementation of various applications and having exceptional coding talents with proficiency in various coding languages,including Apex & Java.

In-depth knowledge of all the phases of Software Development Life Cycle (SDLC) with concentration on designing, development & implementation of various applications. Rich knowledge in the domains of project planning & scheduling, analysis, requirements gathering, designing & development, customization, implementation & maintenance of business application. Good exposure to smart client application, web application, object oriented concepts .

An ambassador of change, a keen strategist with acumen in providing effective business solution and technical architecture to leverage technology in creating revenue opportunities. Suave and pragmatic with excellent interpersonal and communication skills; popular team player with leadership traits.

CORE COMPETENCIES

- Software Development
- Business Process & Intelligence
- Requirement Analysis
- Proof of Concept(POC)
- Technical/Quality Support
- Team Coordination

TECHNICAL SKILLS

Programming Languages	Core JAVA, C, C++, Apex
Technologies	Swing, JSP, JSTL, JDBC, JS, HTML, AOP, JPA, Ajax, JQuery, AngularJS,Salesforce
ORM Tools	Hibernate
Web service	Rest API
Framework	Spring, Spring boot
Web Server	Tomcat 9.0
IDE	Eclipse, Net Beans, Spring Tool Suite
Databases	MySQL
Design Pattern	Spring MVC
Build Automation Tool	Maven
Methodology	Agile Development
Operating Systems	Windows 95/98/Me/2000/XP/Vista/7/8/8.1/10

PROFESSIONAL EXPERIENCE

360 DEGREE CLOUD TECHNOLOGIES PRIVATE LIMITED, FARIDABAD   **SINCE MAR 2020**
Software Engineer

- Administering multiple projects activities which involve determining operational feasibility by evaluating analysis, objective & requirements, solution/software development and defining specifications.
- Responsible for preparing design documentations, planning project proceeding, conducting requirement analysis and ensure application development & implementation within estimated timelines.

- Significantly contributing in software development life cycle (SDLC), programming techniques; preparing reports to gauge project progression whilst update dashboard on a regular basis & strictly adhere to the event calendar.
- Liaising with business clients to understand the requirements and implementing the same to get the specified results and concluding feedback to enhance application/software performance & stability.
- Deploying the application/software in test environment and initiating the process of user acceptance testing (UAT) whilst responsible for conducting peer review of test scripts, fixing bugs and resolving technical errors occurred.

MABSQUARE SOFTWARE TECHNOLOGIES PRIVATE LIMITED, BENGALURU **OCT 2018 – FEB 2020**

Software Engineer

- Participated in the activities involved in SDLC and supported the software development team in delivering various projects and involved in developing/coding using Agile Methodology.
- Interacted with the clients (to get the requirement), developers & functional team to plan the proceedings whilst developed the business modules, data access layer and composed automation of software life cycle.
- Prepared software design documentations and planned the proceedings, to be completed within the estimated timelines and engaged in troubleshooting the issues raised by designing technical solutions.
- Developed various reports for analytical purpose and conducted test cases of software/ application in test environment and initiated the process of user acceptance testing to gauge all specifications are met.

PROJECTS

- **Project - Patient Record Maintainer Application**

Description –	o The web application is used to save & update patients' details multiple times, which can be used by the clinic
	o The application automatically calculates the body mass index (BMI) and displays the reports whenever required
Technologies Used –	Core Java, Spring Boot, Rest API, My SQL
Team Size –	7
Role –	Developer
Contribution –	o Created POJOS & Models, the REST controller & the repositories and defined entity relationships
	o Involved in adding the cross- site origin function

- **Project - Flight Booking Application**

Description –	o This is a full-fledged web application by which a customer can find flights and reserve by designated location and date.
	o This will email the itinerary details to the customer over after booking and will let the customer do web check-in.
Technologies Used –	Core Java, Spring Boot, Rest API, JSP, JSTL, HTML, My SQL, Logging, Spring Security
Team Size –	7
Role –	Developer
Contribution –	o Supported team in creating POJOS & JSPS
	o Designed the Presentation Layer, Service Layer, Data Access Layer, Integration Layer and also contributed work in different utility classes

TRAININGS

JSpiders, Bengaluru, Java Developer Trainee, Jun 2018 – Oct 2018

EDUCATION / CERTIFICATIONS

- **Bachelor of Technology ,** Institute of Technical Education & Research, Bhubaneswar, Odisha, 2018 with CGPA - 7.21
- **Intermediate,** K. B. R. College, CHSE(O), Cuttack, Odisha, 2014 with 65%
- **SSC,** B. N. High School, BSE(O), Anandapur, Odisha, 2012 with 82%
