Project Experience

1) Project Name:- **"Retrieval Of Information By Using QR Code".**

2) Duration   :- Aug 2016 - May2017.

3) Team Size   :- 4.

4) Role Played :- Developer and Tester.

5) Skills Used :- Java,Android,MySQL.

6) Project Description : - My Project is an ERP system for an Hospital Management. Nowadays, due to increase in number of road accidents there is a need to access a person's medical/contact information in case of emergencies for first aid and hospital & other formalities. In order to shorten the admitting procedures when a patient seen in the emergency department is subsequently admitted to the hospital, we will be retrieving their information stored in database which is scanned with the help of a QR Code containing a link to the victim's emergency information. This will help hospital authority to give appropriate medication to the accident victim and inform his/her family.

Technical Proficiency

> Operating System   : - Windows, Android,Linux,Ubuntu.

> Programming Languages   : - C, C++,Java,HTML,JavaScript,R Programming.

> Databases   : - MySQL,Oracle SQL,MongoDB,Cassandra.
