   Language of implementation: PHP
   Description:
   This website is a Rent Portal website through which a user can access its information and manage all the adding, updating, deleting the assets and some of its tasks. The Admin user can change the update, the information regarding property selling and buying and cancellation. Companies or individual agents can also advertise their property.

3. **Project name :** Online Tutorials
   Language of implementation: PHP
   Description:
   Online Tutorial is a web based application intended for students .It enables student to get a study material on the core subjects they want to learn. Once the user login they can see which book is available.To read the book user have to download it. User can also write the feedbacks.

4. **Project name :** Teachers Information System
   Language of implementation: ASP.NET
   Description:
   This website is developed for NAAC (National Assessment and Accreditation Council). NAAC undertakes Students, Teachers, Library, Examination, Research and Consultancy modules for a particular institute. Among that I had given project on teacher's module. In teacher's module we store and update data of all teaching and non-teaching faculty members from their date of joining to the day till they work.. As NAAC accreditation concerns with the teachers pursuing Ph.D. also, we have classify teachers in another category under "Faculty Ph.D."

5. **Project name :** Social Networking Site
   Language of implementation: ASP.NET
   Description:
   Social Networking Site is a web based application like Facebook.This website is designed to meet the global friend's corner and get connected by sharing the events, entertainments, chatting room, E-learning, uploading the photo gallery, seeking for friends login, events held and etc.
